# Monitor Arm USBARM

with gas spring and 2 USB ports

USB port within easy access for mobile phone charging

Clearly marked adjustment with signs + and - for lift tension

## Ergonomic Benefits

- Fingertip-light adjustment up and down through gas lift
- Angle adjustment in height and sideways to avoid disturbing reflections
- Height and distance adjustments for optimal viewing
- Easy access from above to all adjustment screws, no groping underneath the arm for screws
- Specialty: two USB ports in the arm base, no hunching under the desk for computer USB ports to charge a mobile phone, transfer data, connect mouse or keyboard etc.

## Other benefits

- Additional desk space is gained by using the arm instead of a monitor stand
- Arm offers versatile adjustments that are not possible with a monitor stand
- Allows customer service personnel to rotate the screen to make it visible to a customer sitting opposite
- Portrait-to-landscape adjustment of the monitor
- Only a few parts to be assembled before installing
- Easy assembly, parts clearly marked with the same letters in the package and assembly instructions
- Both desk clamp and grommet mounting parts come with the arm
- USB ports 3.0 in the arm base can reach transmission speeds about ten times faster than USB 2.0 ( provided the USB ports of computer used are also USB 3.0 ports)
- Only a few parts to be assembled before installing

## Technical specification
